Profile

I am a proactive individual that is intrigued by the world of software and embedded systems development and am looking forward to acquiring experience and broadening my knowledge in industries that offer these or related opportunities. I am eager to be challenged in order to grow and further improve my IT skills. My greatest passion in life is using my technical skills to benefit other people and organizations. I am however open to tackling new challenges and working with new technologies including new languages, tools and frameworks.

Professional Experience

2024/01 – present
Johannesburg,
South Africa

Junior Software Engineer

TAUSPACE [🔗](#)

- Develop base code and integrate observability into both new and existing systems.
- Worked with RESTful APIs to create and manage data services.
